

Custom Rubber Gasket

Custom rubber gaskets play an important role in applications in a variety of industries. While most rubber washers function similarly, they are not universal. The specific rubber material and gasket style may vary by application.

Product Introduction of the Custom rubber gasket.

At Liangju technology, we have an extensive line of gaskets to ensure we have a solution for any application.

Advantages of Custom rubber gaskets

Custom rubber gaskets offer advantages in numerous applications. They help prevent leaks and pressure losses in countless forms of process equipment, piping systems, machinery, and more. At Mercer Gaskets, our Custom rubber gaskets offer the following benefits:

customizability

- Available in a variety of colors
- Extensive material selection
- Targeted resistance

2. Product Parameter (Specification)

Product Name:	Custom rubber gasket
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Any size, Customized/standard and nonstandard
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Varies

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Custom rubber gaskets by strictly follow ISO 9001:2015 and IATF 16949.

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
