

Tire Repair Patch Mushroom

The following is an introduction to Tire Repair Patch Mushroom, I hope to help you better understand Tire Repair Patch Mushroom. Welcome new and old customers to continue to cooperate with us to create a better future together!

1. Product Introduction of the Tire Repair Patch Mushroom

We have established a reputation for high-quality custom Tire Repair Patch Mushroom. We pay very attention to detail and committed excellence for every project, coupled with our experience and knowledge of the industries we serve, ensure that your Tire Repair Patch Mushroom will exceed your expectations.

Advantage of our Tire Repair Patch Mushroom:

1. This Tire Repair Patch Mushroom is made of top-quality rubber, features high temperature resistance, high hardness and high wear resistance, perfect for tire repair, and make your beloved car run again.
2. Features a rubber stem to fill hole in tire which prevents water entry into the wound, so the steel belts will not get rust or delaminate, give full protection to your tire and your driving will be more secure and ease
3. Professional puncture repair plug, can be used on car, motorcycle truck bus and agricultural tyres. Whether your are amateurs or professionals, round plug patch is a good choice for you to repair your tire.
4. It's the best way to insure a leak-free, permanent repair for a hole in the tread, much better than just a patch alone. We stand behind all of our them with a 100% product guarantee and promise to give you the best in customer care

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
